Part III REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), a print layout device comprising a margin setter adapted to set a margin for a sheet; a spooler adapted to spool drawing commands based on a print request provided by an application in a memory; a data re-calculator adapted to re-calculate position and distance data associated with the drawing commands spooled by the spooler in the memory for each logical page provided by the application in consonance with a printable area of a physical page obtained based on the margin set by said margin setter; and a print job generator adapted to generate a print job comprising at least one printer control command based on the drawing commands and the position and distance data re-calculated by said data re-calculator, wherein the margin setter is capable of setting a binding margin adjacent to a center line in a sheet such that the sheet is folded along a line in the binding margin for bookbinding and said data re-calculator re-calculates the position and distance data such that data generated based on the re-calculated position and distance data and the drawing commands are arranged in the printable area based on the binding margin as claimed in claim 1. Similar features are claimed in claims 58-66. Therefore, claims 58-66 are allowable over the prior art of record for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
